Plugin Homepage: <http://indowebkreasi.com/psbc-lite>

Thank you for downloading Product Showcase By Categories plugin. This plugin works for WooCommerce and allows you to display product showcase with category filters. We really hope it can be useful for your e-commerce website and you have a great success for your business. Please follow this guide to install and how to use the plugin.

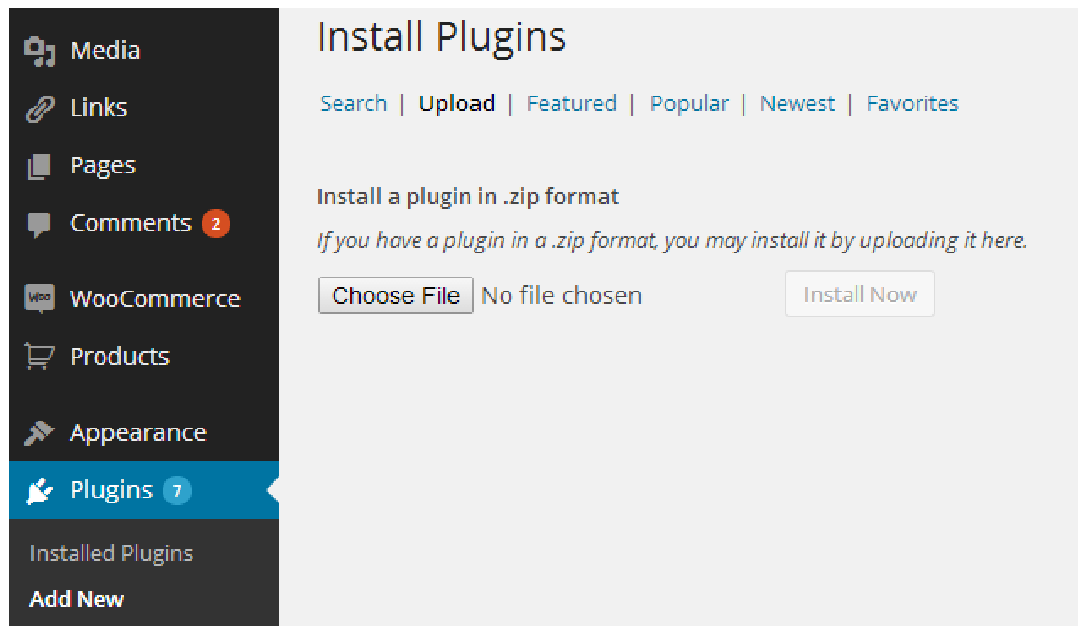

PLUGIN FEATURES

- Display featured products filtered by selected product categories
- Display products as responsive carousel slider
- Use ajax on category change
- Shortcode to display product showcase
- Options to set layout style
- Select product template from plugin or from theme
- Fully templateable

INSTALLATION

Installation is the same as other wordpress plugin, please follow these steps:

1. Go to **Plugins** menu in wordpress administration screen, click on **Add New**.
2. On “Install Plugins” page, click the **Upload** link, choose the plugin zip file named **product-showcase-by-categories-lite.zip** from your computer.
3. Click **Install Now**.

After the plugin has been successfully uploaded and installed, just activate it and you're ready to go.

HOW TO USE

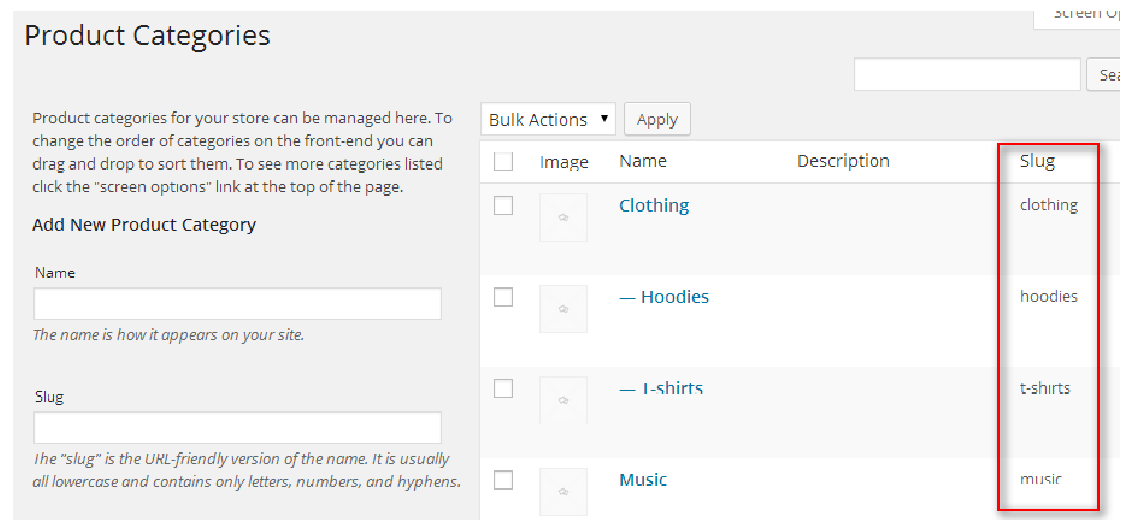

To display product showcase you need to use shortcode. Shortcode is a simple text that you can put anywhere (such as in Post or Page) to do any built-in functionality, in our case it's to tell the plugin where you want to display product showcase.

Shortcode format:

```
[psbc_product_showcase attribute="value" ...]
```

Attribute	Value	Explanation
title (optional)		The title text above product showcase
categories (required)		Specify category slugs ¹ for product filters separated by comma.
limit (optional)		Specify maximum number of products for each category

¹ You can find category slugs on “Product Categories” page that can be accessed via **Products – Categories** menu.

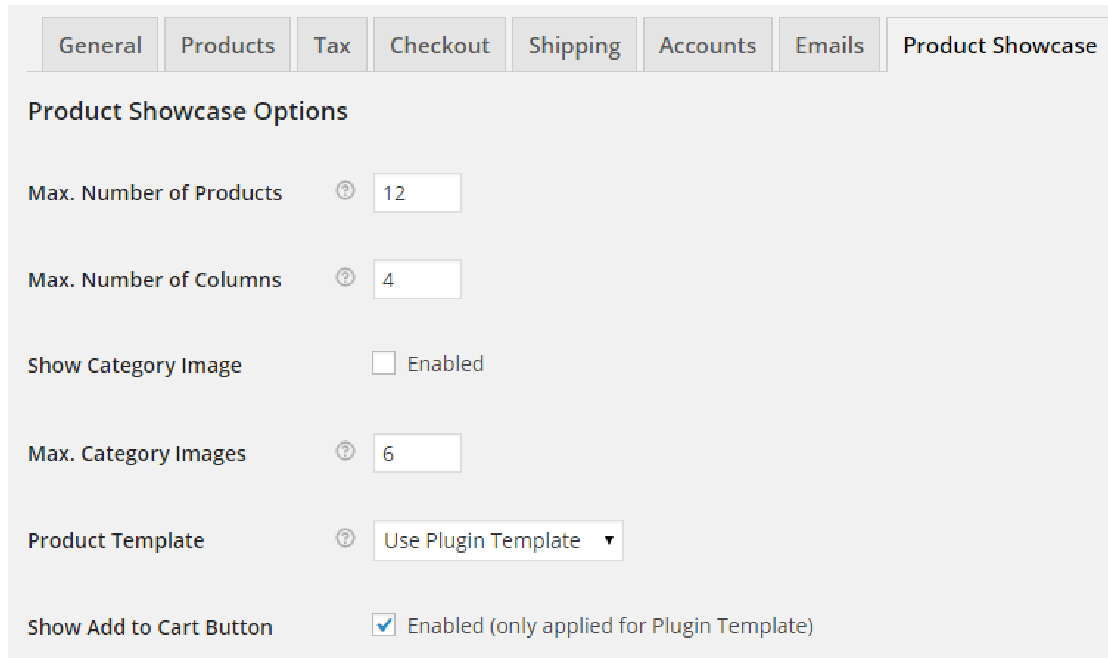

Shortcode examples:

```
[psbc_product_showcase title="Featured Products" categories="albums,singles" limit="12"]
```

Display featured products with albums and singles as category filters, maximum number of products for each category is 12.

SETTING OPTIONS

You can set some options to define default parameters and to tweak the layout of product showcase. To access the options, go to **WooCommerce – Settings** menu, then click on **Product Showcase** tab.

The screenshot shows the 'Product Showcase' tab in the WooCommerce settings. It contains the following options:

- Max. Number of Products:** A text input field with the value '12'.
- Max. Number of Columns:** A text input field with the value '4'.
- Show Category Image:** A checkbox labeled 'Enabled'.
- Max. Category Images:** A text input field with the value '6'.
- Product Template:** A dropdown menu with 'Use Plugin Template' selected.
- Show Add to Cart Button:** A checkbox labeled 'Enabled (only applied for Plugin Template)'.

Field Explanation:

Max Number of Products

Specify maximum number of products (for each category). This value will be used when you don't specify limit parameter in the shortcode.

Max Number of Columns

Specify number of columns when displaying products on desktop screen width (number of columns will adapt automatically on smaller device screen).

Show Category Image (Pro Version)

When enabled, the category filters will show category images/thumbnails.

Max Category Images (Pro Version)

Specify number of category images when displaying categories in desktop screen width (number of columns will adapt automatically on smaller device screen).

Product Template

You can select whether to use product template from plugin or from theme.

Please note: if you choose template from theme, it might not work perfectly since the theme's template might not be designed for products slider.

Show Add to Cart Button (Pro Version)

Show add to cart button for each product (only applied when you chose Plugin Template as Product Template).
